<tr>
<td><strong>Inhalation</strong></td>
<td>Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.</td>
</tr>

<td>Wash with soap and water. Get medical attention if irritation develops or persists. Seek medical advice if symptoms persist.</td>
</tr>
<tr>
<td><strong>Ingestion</strong></td>

</tr>
</tbody>
</table>

#### 4.2. Most important symptoms and effects, both acute and delayed

| Symptoms | Not determined |

#### 4.3. Indication of any immediate medical attention and special treatment needed

**Note to Doctor**

Aspiration during swallowing or vomiting may severely damage the lungs. If evacuation of stomach contents is necessary, use method least likely to cause aspiration.

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

**Suitable and Unsuitable Extinguishing Media:**

- Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the surface of the fire. Do not direct a stream of water into the hot burning liquid.

#### 5.2. Special hazards arising from the substance or mixture

**Fire and/or Explosion Hazards**

Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire.

#### 5.3. Advice for firefighters

**Fire Fighting Methods and Protection**

Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Use methods for the surrounding fire.

**Hazardous Combustion Products**

Carbon dioxide, Carbon monoxide

### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

**General Measures:** No health affects expected from the clean up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this SDS.

**Environmental precautions**

Do not flush to sewer.

Avoid runoff into storm sewers and ditches that lead to waterways.

Remove from water surface by skimming or with suitable absorbents. Do not use dispersants.

#### 6.3. Methods and material for containment and cleaning up

**Methods for cleaning up:** Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Dispose of according to Federal, State, Local, or Provincial regulations. Used fluid should be disposed of at a recycling center. P391 - Collect spillage.

**Reference to other sections**

Follow all protective equipment recommendations provided in Section 8.

8.2. Exposure controls

Engineering Measures
Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.

Respiratory Protection
Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms.

Respirator Type(s)
None required where adequate ventilation is provided. If airborne concentrations are above the applicable exposure limits, use NIOSH/MSHA approved respiratory protection.

Eye Protection
No special requirements under normal industrial use.

Skin Protection
Where use can result in skin contact, practice good personal hygiene and wear impervious gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.

Gloves
Nitrile, Polyvinyl chloride, Impervious rubber
